

Using BeatStep as a slave in Logic

In order to synchronize your BeatStep with Logic first press 'EXT SYNC' button on your controller.

Preferences setup in Logic

- Go to 'Preferences' then click on 'MIDI'
- Open 'Sync' panel
- Click on 'MIDI Sync Project Settings'

MIDI Sync Project Settings in Logic

- Check 'Destination 1'
- In the drop box choose 'Arturia BeatStep' as a destination for the MIDI clock

![[image](sync settings.png)]

Hitting play in Live should now launch BeatStep sequencer.
